

## Science Part 2

### Light makers

Task 1 - These three amazing living things radiate their own light! Compare them and try to work out why this might be a useful skill.

Task 2 - Come up with as many similarities and differences as you can. If you get stuck, think about:

- appearance
- what they do
- where they might be found

2. Decide which one is the odd one out and why. Give reason for every answer and there is no wrong answer!
