

Shunting Problem

Two trains are travelling along the same stretch of single line track towards each other. Each train consists of a locomotive and two carriages. There is however a siding that can take one locomotive and one carriage. How is it possible for the two trains to pass each other by using this siding?

Question time

- Name each of the characters.
- What do you think each of them do on a daily basis?
- What do you think each of their favourite foods might be?
- What do you think each of the characters are really like?

Which period in a human's life do you think is the best and why?

Use your research from this week to help you.
