

## Challenge

A tricycle has 3 wheels. How many wheels are there on 6 tricycles?

Draw a representation of this before writing out the calculation and finding the answer.

## Challenge

James is buying C.Ds. He buys 5 C.Ds at a cost of £3 each. Draw a representation of this before writing out the calculation and finding the answer.

## Answer

A tricycle has 3 wheels. How many wheels are there on 6 tricycles?

Draw a representation of this before writing out the calculation and finding the answer.

$$3 + 3 + 3 + 3 + 3 + 3$$

$$6 \times 3 = 18$$

## Challenge - ANSWER

James is buying C.Ds. He buys 5 C.Ds at a cost of £3 each. Draw a representation of this before writing out the calculation and finding the answer.

$$\text{£3} + \text{£3} + \text{£3} + \text{£3} + \text{£3} = \text{£15}$$

$$5 \times \text{£3} = \text{£15}$$
