

Maths Challenge #3

If the answer is...

0.4

...what is the question?

e.g. What is the decimal equivalent of $\frac{4}{10}$? Is there another fraction that has the same decimal equivalent?

Think of at least 3 questions using your knowledge of fractions and decimals and maybe even percentages too!

Maths Challenge #4

How many different ways can you represent the following fraction as a decimal?

$$\frac{2}{10}$$
