

# Science

Imagine that you are able to spend your whole life as just one age - which age would you choose? Would you choose to be a child without any responsibilities or would you prefer to be a young adult so you are free to do what you want?

Your task this week is to choose from one of the following ages to spend your whole life as:

- Baby
- Child (up to the age of 12)
- Teenager
- Young adult (up to the age of 40)
- Middle aged
- An older person (60+)

You need to explain the advantages and disadvantages of your choice using either Google slides or Google docs to present your learning. Refer to everything you have learnt in Science but also think about the people that you know of these ages and the good and bad things about their lives. We can't wait to see your ideas!

**\*\*\*Send us an invitation to share your work so that we can mark it\*\*\***
