

I am learning to experiment with clay techniques.

What am I learning
today?

I can model, construct and carve.

I can use tools with increasing skill to create
surface patterns and textures.

I can join materials successfully.

I am learning to experiment with clay techniques.

Cross hatching

<https://youtu.be/Mkzc4zwkSz0>

Coil and Pinch

<https://youtu.be/yn7oTvw8QRY>

Smoothing clay

https://youtu.be/pnW6bkb_CP8

Slip, score and blend

https://youtu.be/kdtM_G90rhA

Lets annotate your sketch.

Cross hatching for
the facial features.

Slip, score and
knot for the
hieroglyphs

Pinch technique for
the jar.

What techniques will you be using?

MODELING TOOLS

Start from 1:26

Clay Carving tools:

Tools with sharp edges are good for details like eyelids and forming the mouth. Also, joining clay together.

Ball Stylus:

These are ideal for shaping.

We are going to experiment joining two bits of clay together.

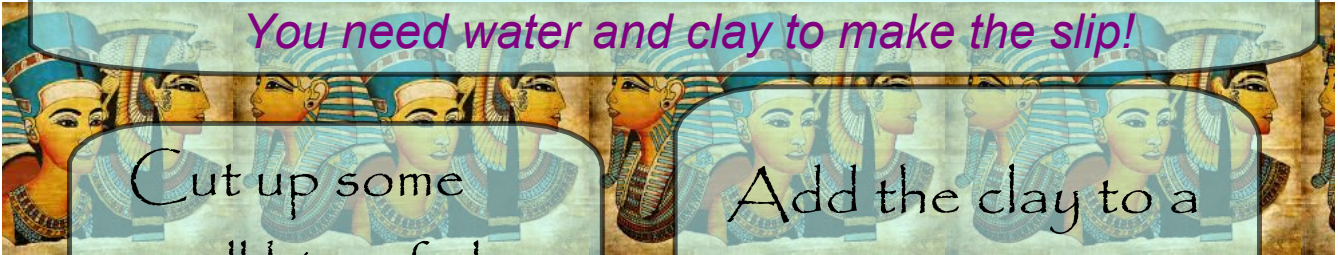

What do we use when we join two pieces of paper?

We use something called slip to act as a glue for clay!

You need water and clay to make the slip!

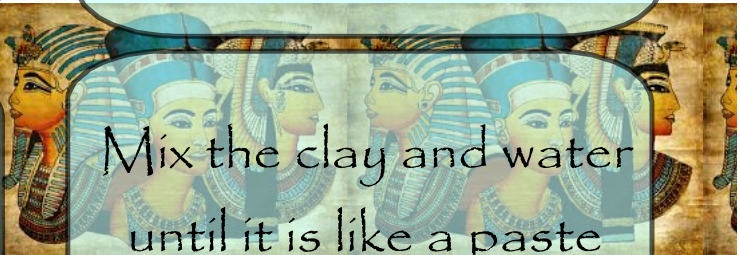

Cut up some
small bits of clay

Add the clay to a
container

Add some water

Mix the clay and water
until it is like a paste
