Boris, Norris and Morris Activity
I can find $\frac{1}{3}$.

Meet Boris, Norris and Morris.

They have been naughty and need to be kept apart from each other.

Tick the cage that the zookeeper can use. Remember they have to have the same amount of space each.

Measure the cage to divide it into $\frac{1}{3}$s so the monkeys each have the same amount of space.

★

Feeding Time!

How much food can each monkey have?

12

Each monkey will get ...... bananas.

18

Each monkey will get ...... strawberries.

27

Each monkey will get ...... oranges.

Challenge!
The zookeeper knows there are between 20 and 30 apples left in the box. How many apples might the monkeys be able to have each?
Remember, it has to be fair!

?

The monkeys can each have ...... apples.
