

Alex could have estimated the number of pencils in each pot and added these together.

or

He could have collected all the pots in a class and estimated the number of 10's, therefore estimating the number of pencils in each class.

or....

### Developing Varied Fluency

1a. **167 and 342**

2a. **139**

3a. **331**

4a.  **$152 + 61 - 124$  or  $152 - 124 + 61$**
