

# Challenge

Lucy and Jack want to plant a row of 23 flowers in their garden.

Each pack of seeds contains enough for 3 flowers.

How many packets of seeds do they need to plant 23 flowers?

Will there be a remainder?

# Challenge

Lucy and Jack want to plant a row of 23 flowers in their garden.

Each pack of seeds contains enough for 3 flowers.

How many full packets of seeds will they need?

Will there be a remainder?

$$3 \times 7 = 21$$

Answer : 7 R2

Lucy and Jack will need 7 full packets of seeds ( $3 \times 7 = 21$ ) and will use 2 seeds from another packet (remainder 2).
