explain the impact of
discrimination

Context: LGBTQ+ Month

What is discrimination?

Example of Age Discrimination

The middle-aged woman is hired; however, the old-aged woman is not hired. The middle-aged woman is hired because she can do a lot, but the old-aged woman is not because she can not do as much as the young; however, the old has more experience than the young.

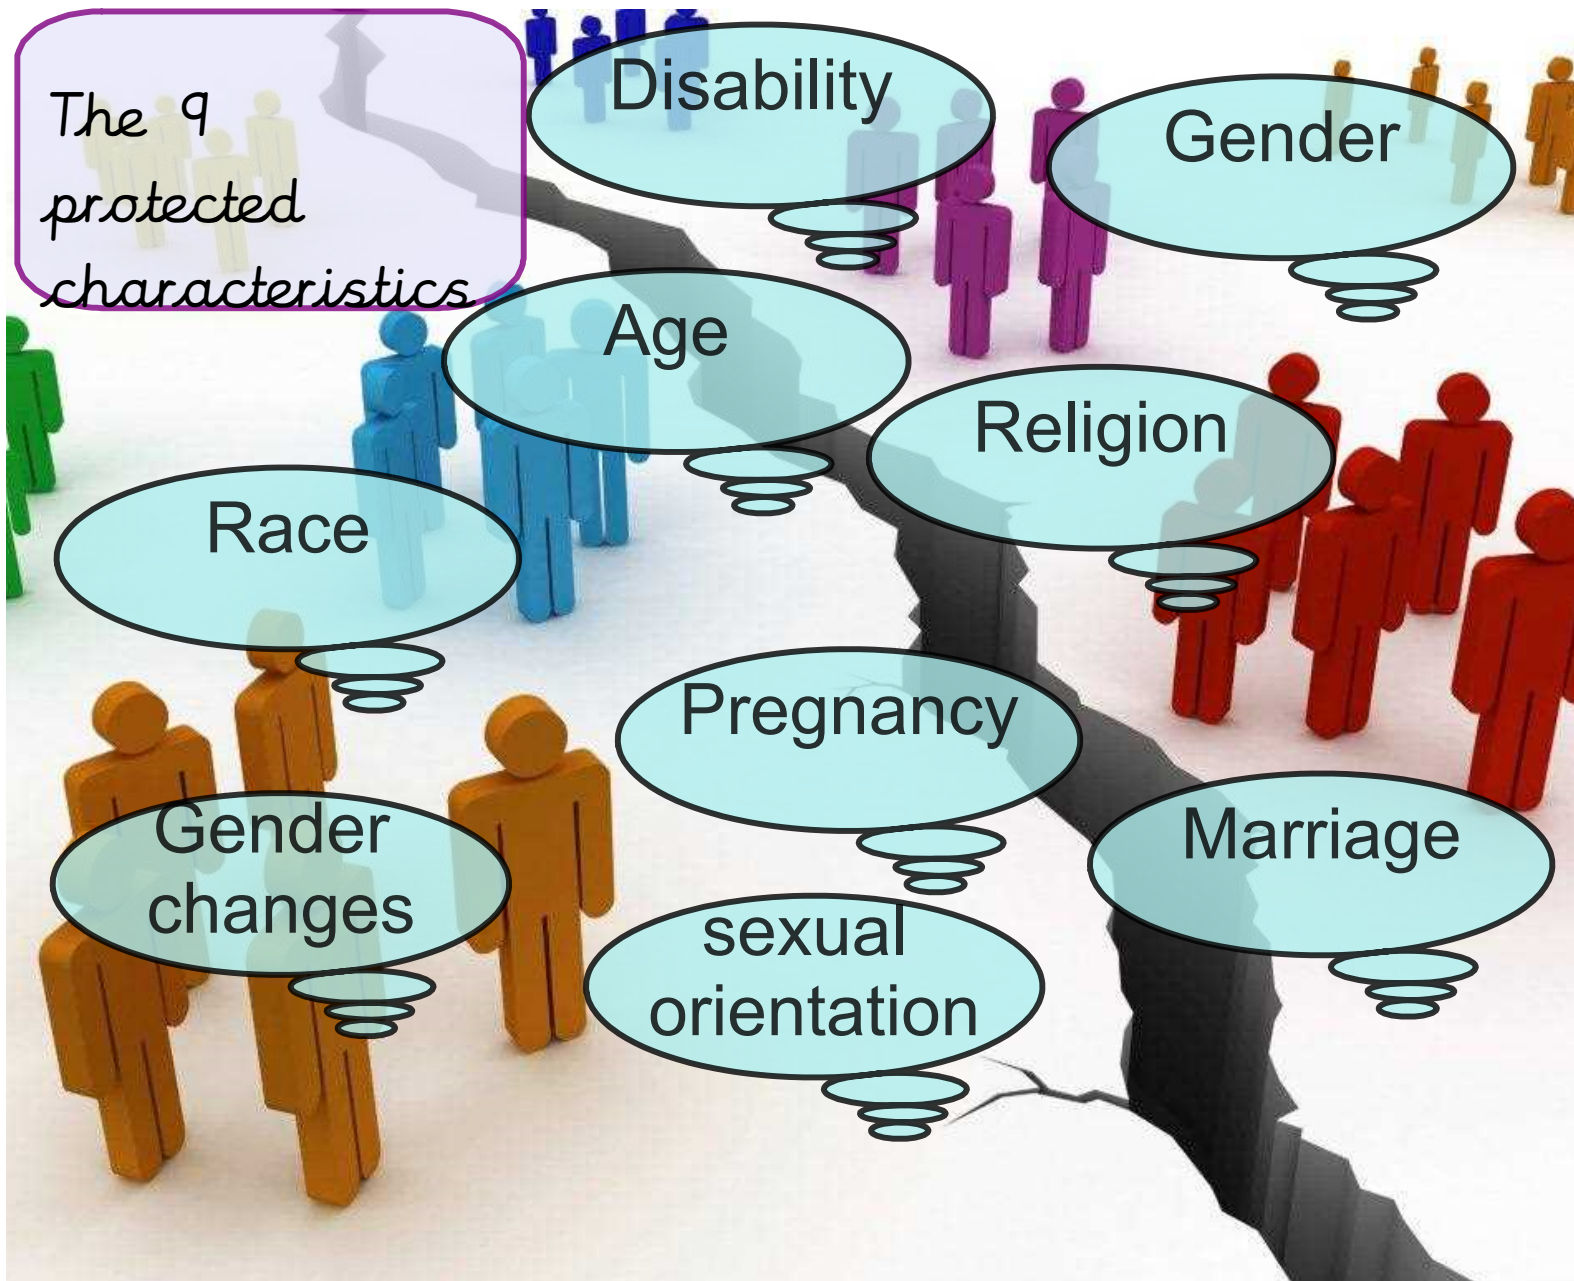

What is discrimination?

2. recognition and understanding of the difference between one thing and another.

What do we mean by
'sexual orientation'?

Sexual orientation is the emotional, romantic, or sexual attraction that a person feels toward another person whether it is someone of the same gender or the opposite gender.

Language

- Homophobic language doesn't just affect gay people. It affects pupils who have gay friends and family as well, by suggesting that there is something wrong or inferior with their friends and family members. There are around 20,000 young people growing up with same sex parents. Research by the University of Cambridge *Different Families* 2010 found that the children of these parents find the use of the word gay as an insult, upsetting and makes them think there is something wrong with their parents.
