

## $\frac{1}{4} + \frac{3}{8} = \frac{4}{12}$

## False

To add two fractions, they need to have the same denominator. Then you can add the numerators.

## $\frac{1}{\frac{1}{4}} + \frac{3}{\frac{1}{8}} = \frac{2}{\frac{1}{8}} + \frac{3}{\frac{1}{8}} = \frac{5}{\frac{1}{8}}$
