

# Blitz Art Craft Instructions

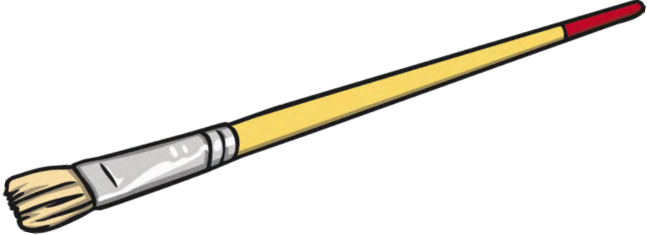

## You will need:

- Printout of Blitz Templates
- A4 piece of card
- Red paint
- Yellow paint
- Blue paint
- Paintbrush
- Plate for paint
- Scissors
- White glue (such as PVA)
- Glue spreader
- Plate for glue

## What To Do:

	<b>1</b> Position your piece of A4 card in the landscape format. To make the sky, paint the piece of card (using the yellow paint) along the bottom of the page.		<b>3</b> Using the Blitz Templates, choose the buildings that you want to use for the skyline (you won't need them all). Carefully, cut out your chosen buildings and set them aside for later.
	<b>2</b> Next, mix the yellow paint with a little red and paint along the middle of the page. Then mix the red paint with some blue paint and paint along the top of the page.		<b>4</b> Carefully, cut out the light beams from the Blitz Template.

5

When the painted background is dry, position your buildings along the bottom of the page. Then, use the glue to stick the light beams to the page. The smallest end of the light beams should be nearer the bottom of the page (starting from the buildings), with the largest part of the beams pointing towards the top of the page.

6

Finally, glue your chosen buildings into place along the bottom of the piece of painted card. Top Tip: overlap the buildings to make your design look more realistic.

## Step 1

Position your piece of A4 card in the landscape format. To make the sky, paint the piece of card (using the yellow paint) along the bottom of the page.

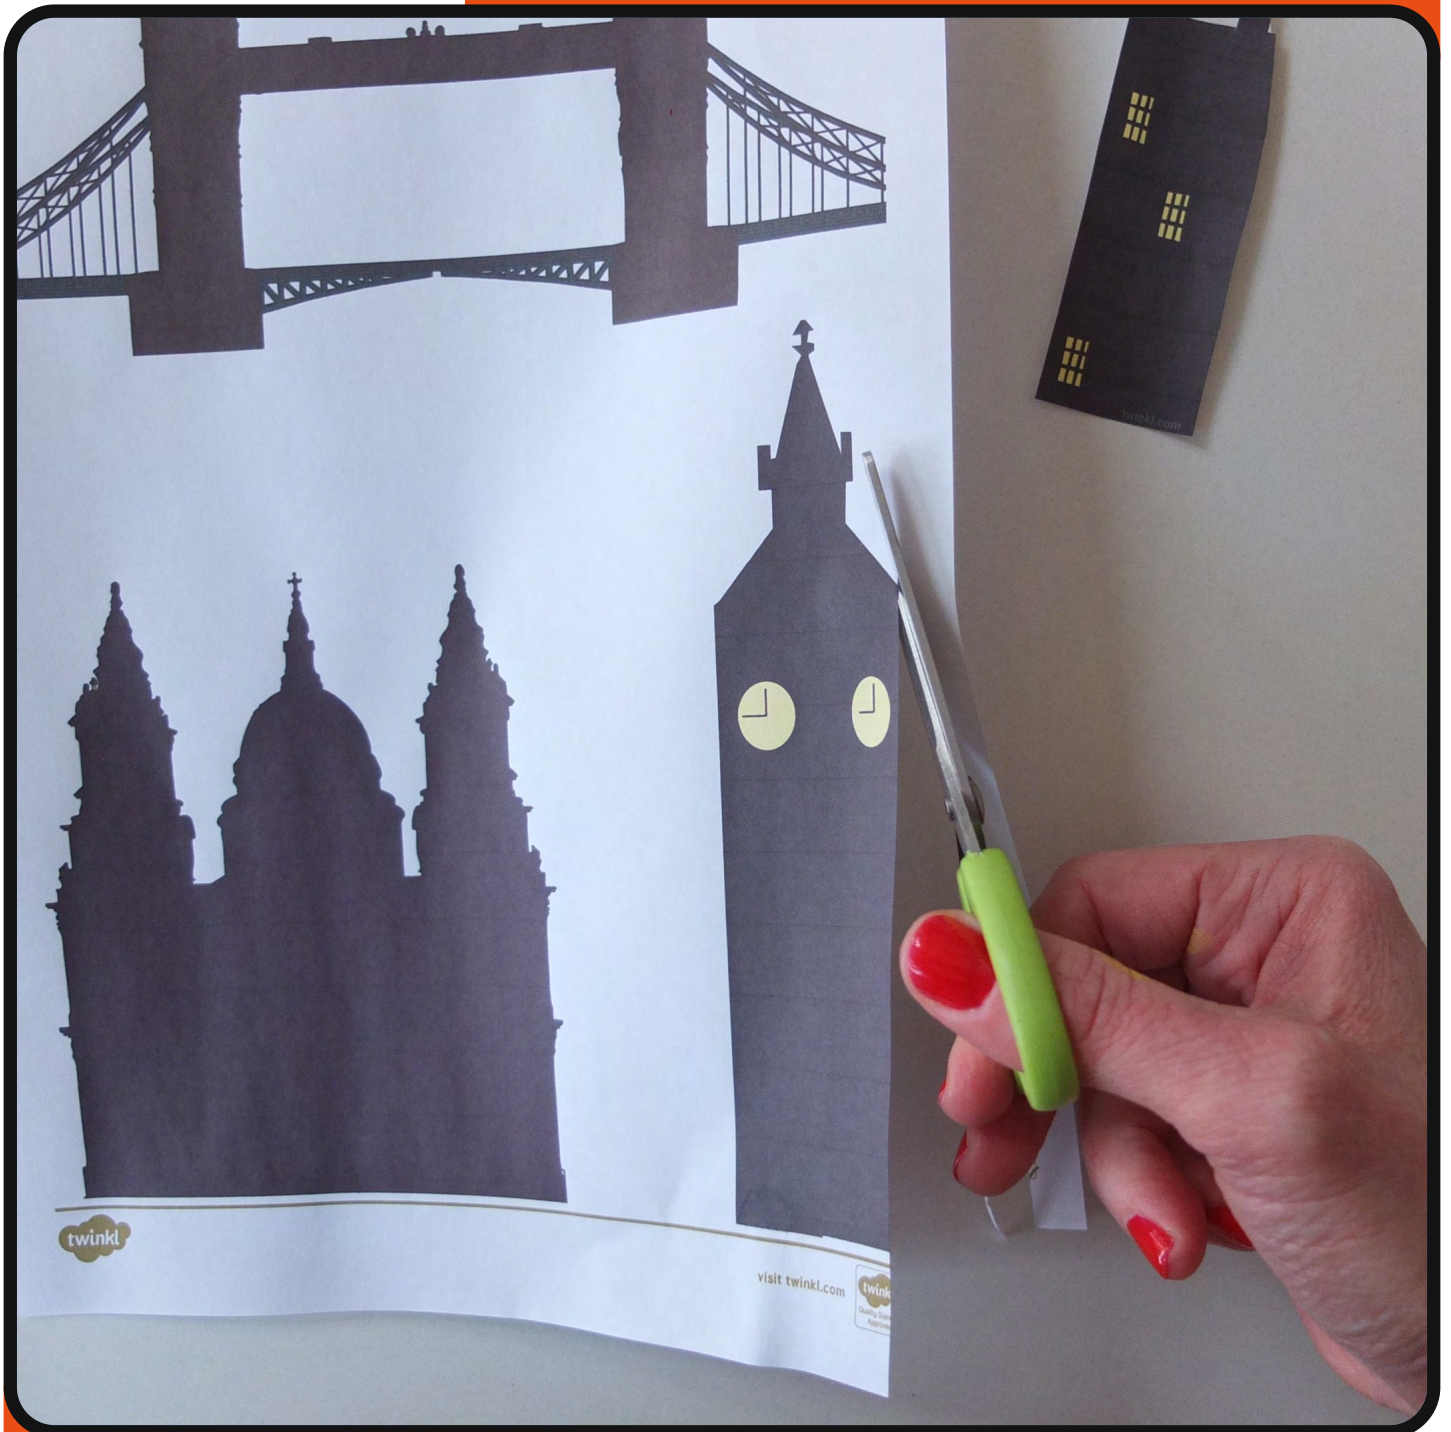

## Step 2

Next, mix the yellow paint with a little red and paint along the middle of the page. Then mix the red paint with some blue paint and paint along the top of the page.

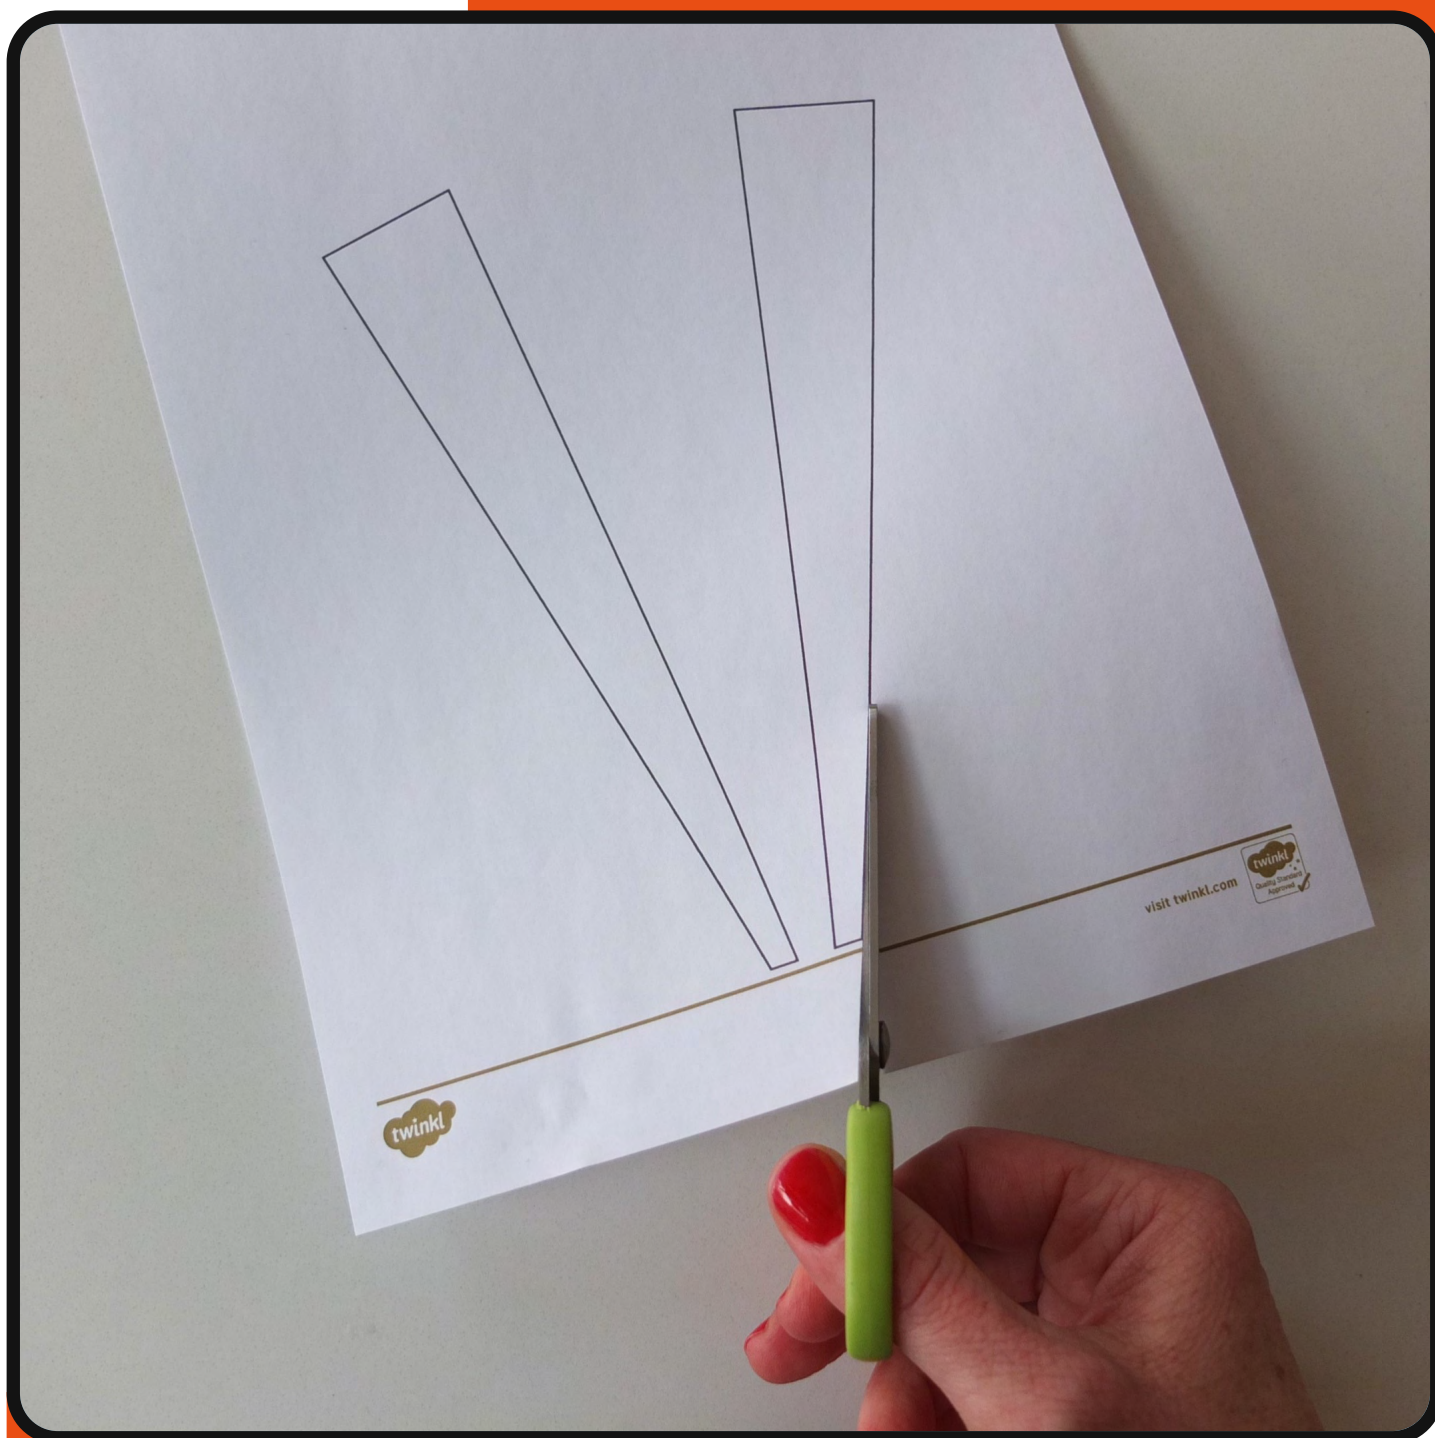

## Step 3

Using the Blitz Templates, choose the buildings that you want to use for the skyline (you won't need them all). Carefully, cut out your chosen buildings and set them aside for later.

## Step 4

Carefully, cut out the light beams from the Blitz Template.

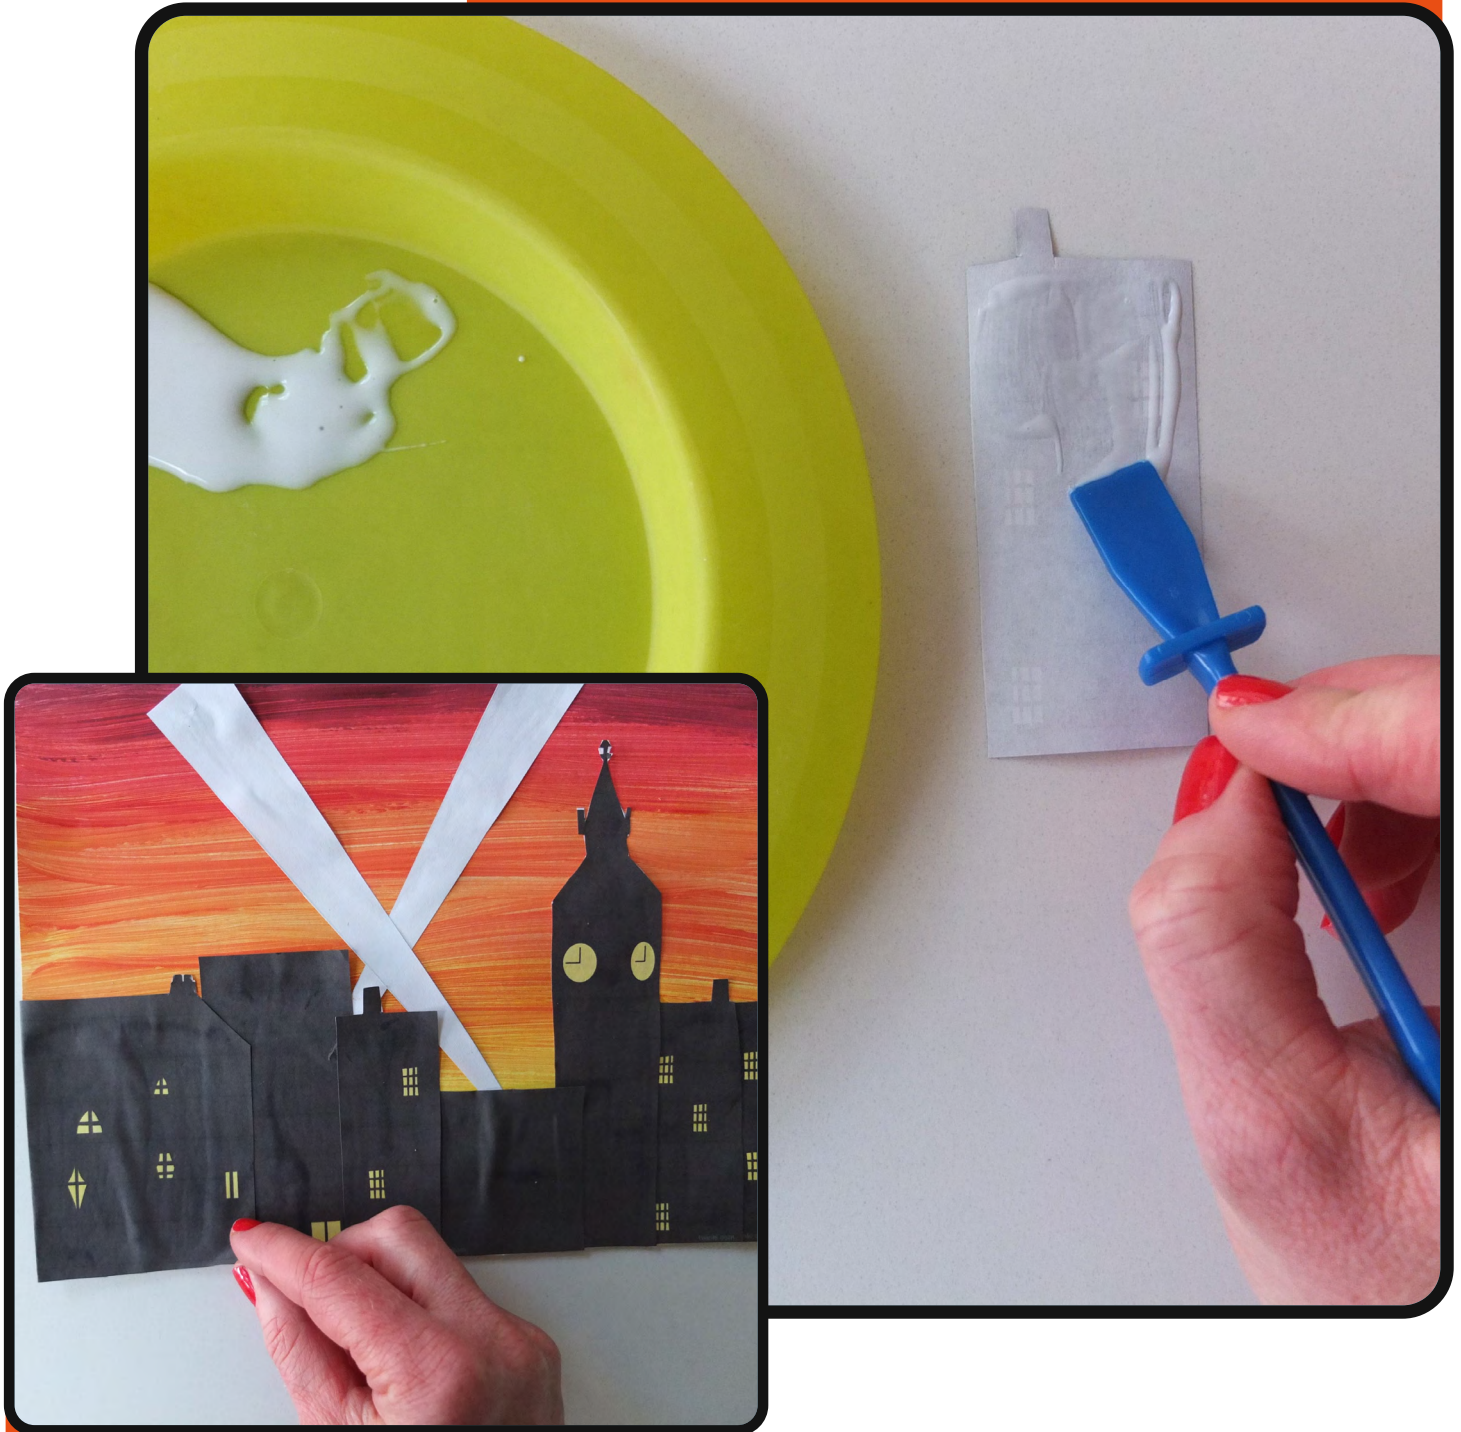

## Step 5

When the painted background is dry, position your buildings along the bottom of the page. Then, use the glue to stick the light beams to the page. The smallest end of the light beams should be nearer the bottom of the page (starting from the buildings), with the largest part of the beams pointing towards the top of the page.

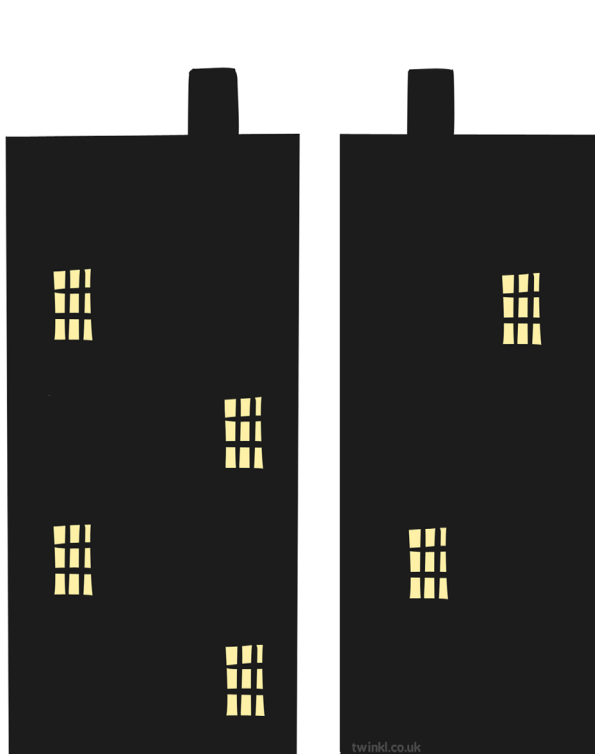

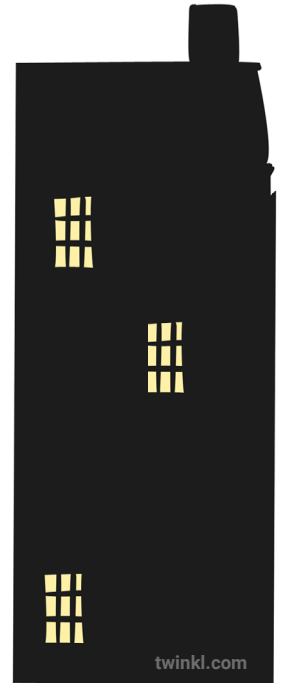

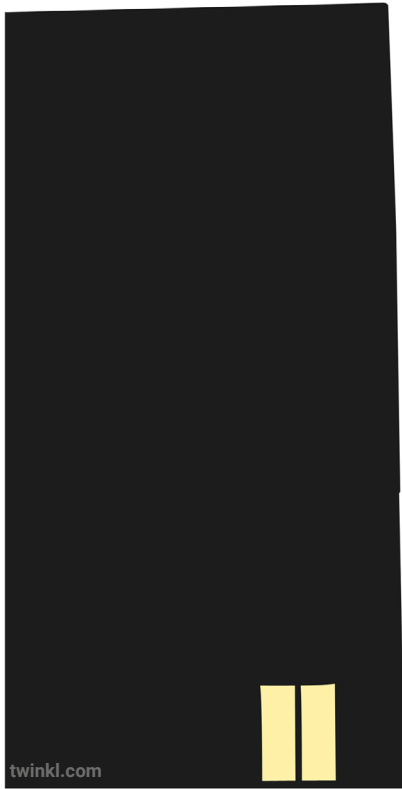

## Step 6

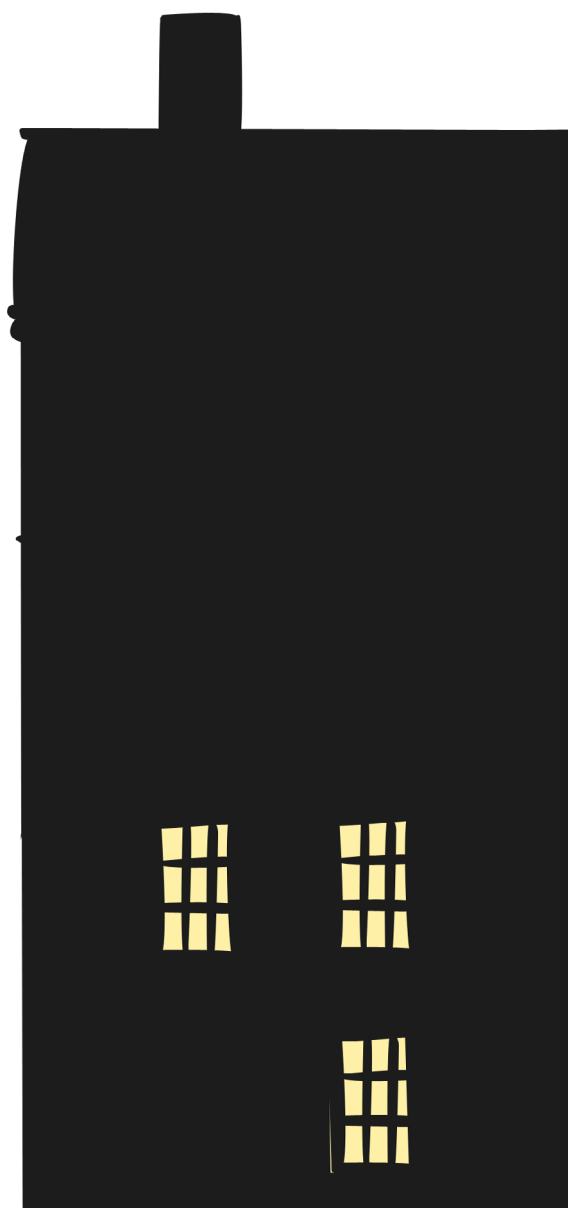

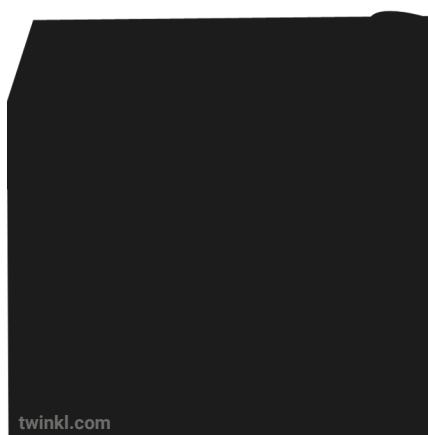

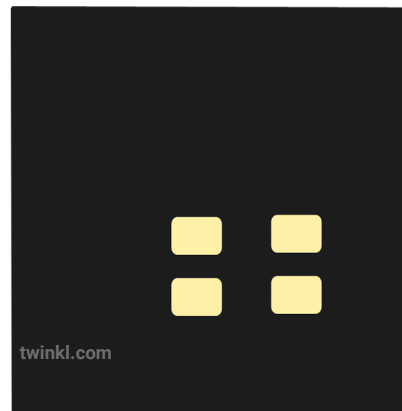

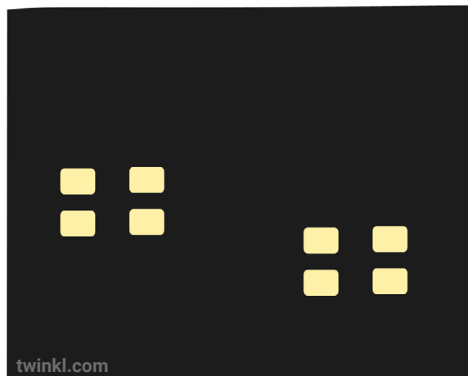

Finally, glue your chosen buildings into place along the bottom of the piece of painted card. Top Tip: overlap the buildings to make your design look more realistic.
