

Maths Challenge #1

If the answer is...

$$2 \frac{4}{8}$$

...what is the question?

Need help?

One question could be:
'What is ...as a mixed
number fraction?' Can you
think of anything better?

Use your knowledge of mixed numbers and improper fractions to write a question of your own.

This can be an arithmetic style question or a worded problem! Maybe you could try both?!

Maths Challenge #2

Would you rather have $\frac{23}{7}$ of cake or $4\frac{2}{7}$?

In your explanation, make sure you include appropriate mathematical vocabulary as well as show what you know about fractions so far!

Can you write your own 'would you rather' question or questions?

Maths Challenge #3

Write as many facts as you can about the fraction...

$$2 \frac{4}{8}$$

e.g. the numerator is...

Make sure you include appropriate mathematical vocabulary as well as show what you know about fractions so far!
