

L.O. I am learning to divide with remainders.

Remember, a remainder is what you have left over once you have shared out equally.

James has 22 cookies. He shares them between 10 of his friends.

How many cookies does everyone get?

How many remainders are there?

Work out these division calculations by drawing the groups and look out for any remainders!

$21 \div 5 =$	$22 \div 5 =$
$23 \div 5 =$	$24 \div 5 =$

L.O. I am learning to divide with remainders.

Remember, a remainder is what you have left over once you have shared out equally.

James has 22 cookies. He shares them between 10 of his friends.

How many cookies does everyone get?

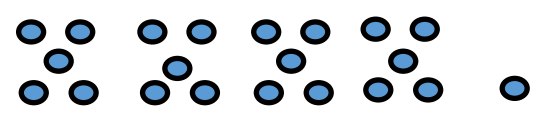

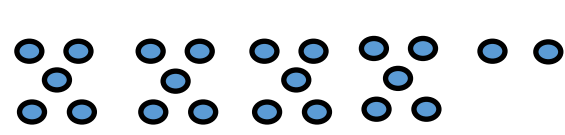

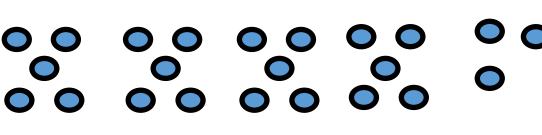

How many remainders are there?

$$22 \div 10 = 2 \text{ r}2$$

James' friends get 2 cookies each and there are 2 left over.

Work out these division calculations by drawing the groups and look out for any remainders!

$21 \div 5 = 4 \text{ r}1$ 	$22 \div 5 = 4 \text{ r}2$ 
$23 \div 5 = 4 \text{ r}3$ 	$24 \div 5 = 4 \text{ r}4$
