

On a digital clock, there are certain times when the numbers are in consecutive order, in counting order, either forwards or backwards

eg 1:23 or 5:43

How many times during a day does this happen?

- Fill in the gaps in the story with the digital time.

Lucy gets up at quarter past eight in the morning _____. She has her breakfast at twenty to nine _____.

Lucy goes shopping at quarter to eleven _____ and returns home at twenty past one in the afternoon _____.

Can you write your own story about your day?
