

Both questions will have the same answer.

1  $12 \overline{) 4752}$

- 2 Work out the length of the rectangle.

# True

Apart from the units!

Using short division would be a good method to work out the length of the rectangle.

1 
$$\begin{array}{r} 396 \\ 12 \overline{) 4752} \end{array}$$

2 Work out the length of the rectangle.
